Since 1985, RRSI has been a leader in waste reduction and recovery strategies. Institutions such as hospitals and universities have special waste handling needs that are well served by our facility engineering and management team. Our expertise in this area adds value to our clients' recovery and cost-savings initiatives and has played a significant role in achieving our corporate mission of greater material reuse and recovery.

### **Spectrum of Institutional-Related Services**

RRSI provides a comprehensive range of services to public, private and non-profit university, hospital and corporate campuses, helping to reduce waste handling costs and environmental impact, while establishing "best practices" programming. Our team of engineers, planners, educators and analysts specializes in customized turnkey services that range from facility planning and feasibility, to design and engineering, to collection systems and operational analyses.

### **System Analysis/Benchmarking**

Facility planning and project development tools such as program benchmarking and performance review are essential in evaluating and solving problem areas related to waste reduction and management. Cost-benefit models help identify cost-effective recovery incentives that often lead to competitive bidding for improved services and materials marketing and upgraded equipment. In addition, RRSI assures that the systems being studied and improved upon are in compliance with regulatory standards.

### **Implementation/Management**

RRSI provides administrative, project management, and construction management assistance to implement quality, cost-effective programs. Capital and operating budget review and management, contract negotiation, equipment procurement, and contract and operations oversight are just a few skills RRSI's applies to new program development, or program upgrades. RRSI can act as a "resource manager" providing a range of system performance skills, including: vendor management, staff education and training, performance review, troubleshooting, and customized SOPs.

### **Related Services**

RRSI capabilities range from engineering, to planning and analysis, to communications. We apply these skills to a variety of client needs beyond facilities management, including integrated solid waste management, recycling, and pollution prevention.
